Project Description:

The project provides for campus-wide capital renewal, including building envelope, HVAC system and low-voltage system improvements.

Building envelope improvements include:

- A new roof membrane or complete reroof of existing buildings
- Replacement of sealants at sidewalk to wall transitions and all tilt-wall panel joints
- Select new downspouts

HVAC scope includes:

- All new air-handling units (AHUs), including bi-polar ionization
- New heating hot water boiler and piping
- New condenser, chilled water pumps, and condenser water treatment
- A new building automation system

Low-voltage system improvements include:

- A new fire alarm, intercom and security camera systems
- A new gymnasium sound system

Project Update:

Project achieved substantial completion and awaits completion of the requirements needed for final acceptance.
