## **Benefits of Building Green Schools:**

- Conservation of resources
- Improved student performance
- Improved indoor air quality
- Increased teacher and staff satisfaction and retention
- Increased parental support
- Lower operating costs

**The OCPS Audubon K-8 is designed to meet the Green Globes sustainable building standards. Sustainable Features of the Audubon K-8 Project Include:**

## **Site**

- Reduced water use through water monitoring for irrigation system
- Drought tolerant planting

## **Buildings**

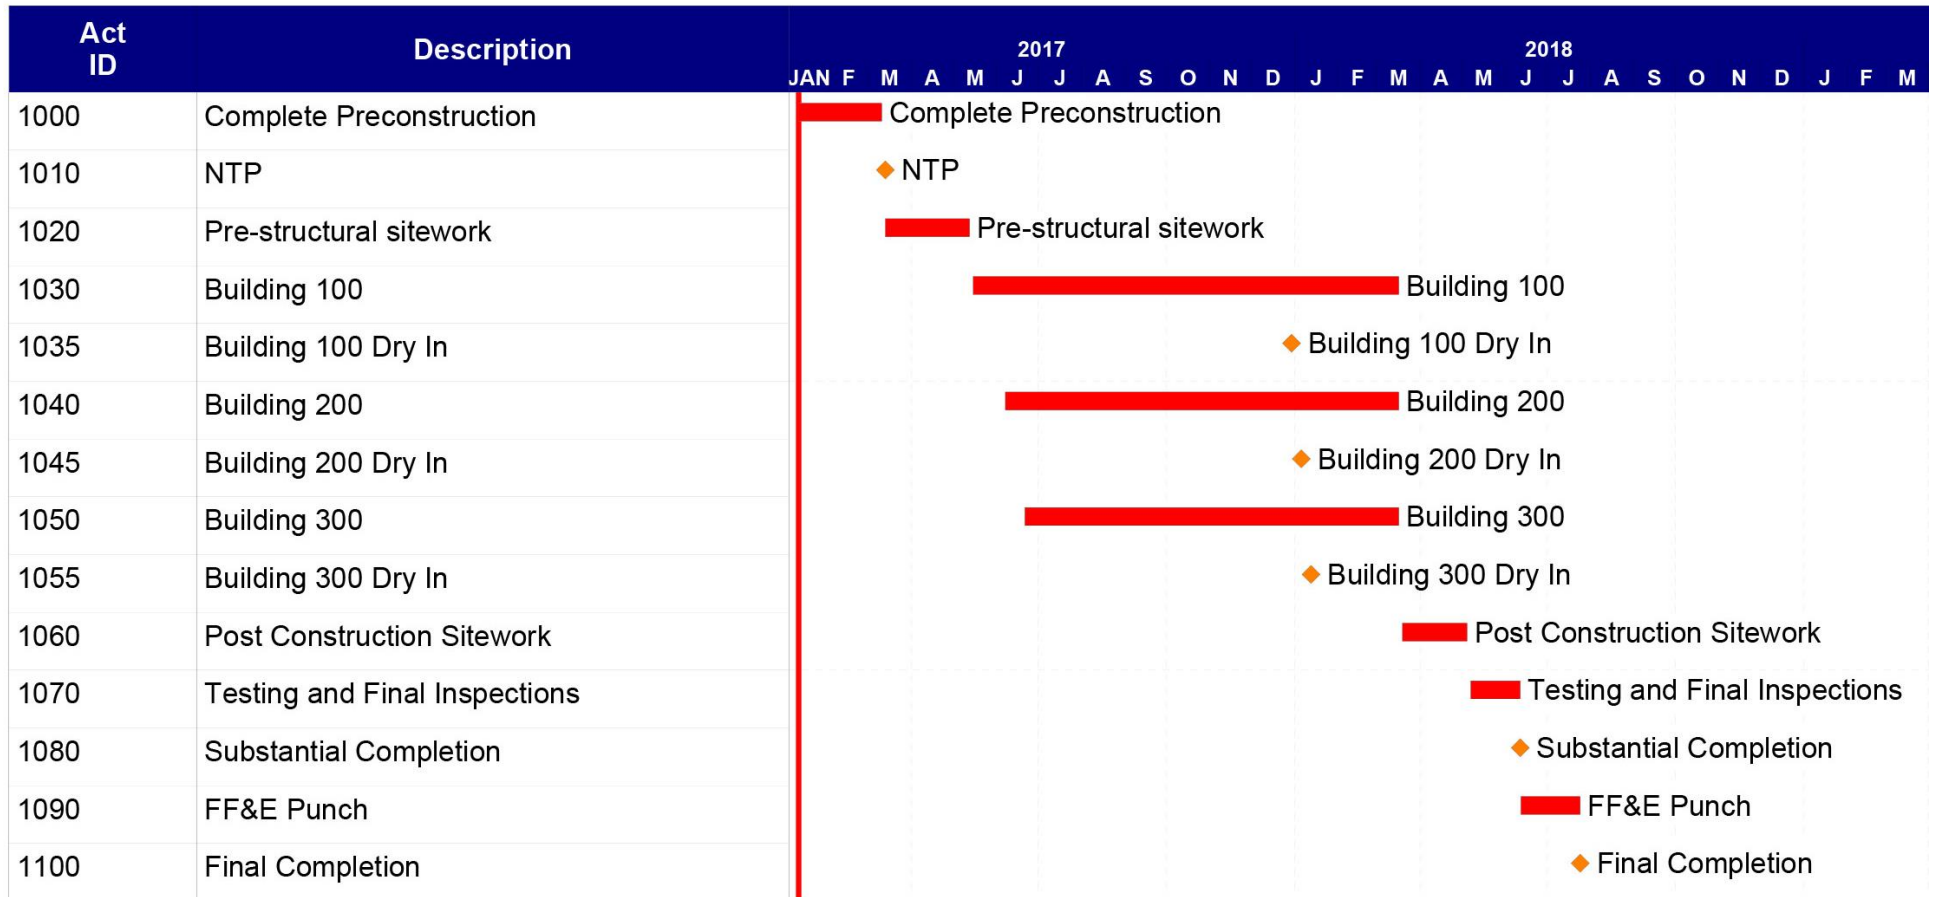

- Light colored roof to reduce heat gain and improve energy performance
- Energy Star rated equipment
- Water saving toilets, faucets, and fixtures
- Daylight in all classrooms
- Daylight in over 75% of all spaces
- Thermally efficient windows
- Ozone-friendly HVAC system
- Energy efficient lighting

An aerial architectural rendering of a school campus. The campus features several interconnected school buildings with flat roofs and large windows. To the left of the main building complex is a baseball field with a visible infield and outfield. In the foreground, there is a large, rectangular parking lot with several trees planted along its perimeter. The entire scene is set against a light, hazy background, suggesting a clear day. The text "Questions and Answers" is overlaid in the center of the image.

## Questions and Answers
